Warnings

glmm: The final Hessian matrix is not positive definite although all convergence criteria are satisfied. The procedure continues despite this warning. Subsequent results produced are based on the last iteration. Validity of the model fit is uncertain.

Model Summary

Target	AIS length	
Probability Distribution	Normal	
Link Function	Log	
Information Criterion	Akaike Corrected	-10636.723
	Bayesian	-10614.652

Information criteria are based on the -2 log likelihood (-10642.725) and are used to compare models. Models with smaller information criterion values fit better.
